

• CLIENT BRIEFING · JULY 2026 · ONE PAGE

SMSF property & the *10 August 2026* deadline — in plain English.

The federal government has ended **new borrowing by super funds to buy residential property**. If you've been thinking about buying property inside your SMSF using a loan, here's exactly what's changing, what isn't, and what to do — on one page.

10 Aug 2026

The one date that matters. To use borrowing in your SMSF for residential property, your purchase contract must be **exchanged (signed) before 10 August 2026**. Settlement and final loan approval can happen after — but the contract cannot. Lenders are already bottlenecked, so paperwork needs to move **now**.

➖ ENDING 10 AUGUST

New residential borrowing (LRBAs)

New loans by SMSFs to buy **residential** property are banned from 10 Aug 2026. Off-the-plan is highest risk — if the contract can't exchange in time, the borrowing option is gone.

✓ NOT CHANGING

Everything else

Existing SMSF loans are grandfathered. Borrowing for **commercial / business real property** continues. Buying residential with the fund's **cash** (no loan) remains fine.

1

Confirm with your adviser

Your **licensed SMSF adviser or accountant** confirms whether your fund can and should proceed. This decision is theirs and yours — not a property question.

2

Get finance moving now

Banks have little appetite for rushed SMSF loans. Your broker should **lodge paperwork immediately** — approval queues are the hidden deadline.

3

Find & exchange — fast

This is where I come in: **sourcing the right property** (on- and off-market), negotiating, and driving to **exchange before the deadline**, coordinated with your team.

⚡ WHERE INVESTOLOGY FITS — AND WHERE IT DOESN'T

I am your buyer's advocate, not your financial adviser. I don't advise on your super fund, borrowing structure or tax — your licensed adviser does that. What I do is what the deadline actually demands: *find the right property quickly, secure it at the right price, and get the contract exchanged in time* — while keeping your adviser, broker and conveyancer moving together. If your timeline can't realistically be met, I'll tell you honestly, and help you with the pathways that remain open (cash purchase, commercial, or simply buying well outside super).

Want a straight answer on your timeline?
Message me — I'll tell you honestly if it's still doable.
